¹Your Ring videos are stored in the cloud temporarily, e.g., up to 60 days in the U.S. Check [Ring Protect Subscription Plans](#) for more information about your plan's retention period.

²Ring takes recurring photo snapshots throughout the day so you can see what is happening between motion-activated events (videos) in your Event History Timeline. These photos are stored in your account for up to 7 days. To keep important photos beyond 7 days, download them to your PC or mobile device.
