

Ring Protect

You now have Extra Data.

We're confirming you've opted into Extra Data for 24/7 Backup Internet on your Protect Pro subscription.¹ Here's what that means:

- We'll send you a notification as you get closer to your 3GB limit before charging you for Extra Data.
- We'll charge you \$5 per GB for the data you use over your included 3GB.
- Use the Ring App to control which Ring devices use Backup Internet. To do the same for other devices on your wifi network, use the eero App.
- To keep an eye on your data usage or avoid extra charges, log in to the Ring App.

Note: You can only do these things on the Ring App, which is mobile only and available for Android or iOS.
