

Ring Protect

We've turned off your Extra Data.

We're confirming that we've shut off Extra Data for 24/7 Backup Internet on your Protect Pro subscription at your {DYNAMIC LOCATION} location.¹ Here's what this means for you:

- You can no longer use Extra Data, but you can still use your included 3GB per month of data for Backup Internet.¹
- Your Alarm Cellular Backup will enable your Alarm Pro to continue sending alarm signals (as long as you're subscribed to Alarm Cellular Backup).¹
- If your Extra Data has been shut off due to unpaid charges, you are still responsible for paying the outstanding amount. Visit your account page to make a payment and have your benefits resumed automatically.

Have questions? Tap the button below for more information.
